Connecting an SAIT Issued Laptop to UConn VPN

THIS ALLOWS ACCESS TO NETWORK DRIVES FROM A REMOTE LOCATION

Instructions:

1. Login to the laptop.
2. Connect to your Wi-Fi. Click on the connection icon on your taskbar on the lower right corner of the screen.

3. At the bottom left of the screen, click on the magnifying glass icon.
4. Next to the magnifying glass, start typing in Pulse. You will see under Best match an app called Pulse Secure. Open the app.
5. When Pulse Secure is open, click on the Connect button next to UConnVPN (sslvpn.uconn.edu).

6. If, for some reason, you do not have a connection listed, click on the plus sign next to Connections.
7. Under Name, type in UConn VPN (sslvpn.uconn.edu). Under Server URL, type in sslvpn.uconn.edu and click on Connect.

![Add Connection dialog box]

8. At User Name and Password, type in your NetID and Password, then click the box for Save settings.

![Pulse Secure login dialog box]

9. Type in your Netid and Password and click Connect.

10. You should be able to see your network drives.
11. If you do not see your drives, follow these directions:

a. Click on the magnifying glass in the lower left corner to search.

b. Start typing in “Mobile” until you see Mobile Workstation Drives and click on it.
